Education

Vellore Institute of Technology (VIT), Vellore

Jul. 2024 – Jul 2028

B.Tech in Computer Science Engineering (Information Security)

CGPA: 8.41

Experience

CodeSoft

June 2026 – July 2026

Web Development

Remote

- Designed and developed full-stack web applications including **TaskFlow** and an **E-Commerce** platform using the MERN stack (React, Node.js, Express.js, MongoDB).
- Implemented authentication, RESTful APIs, and complete CRUD operations to manage users, projects, tasks, products, and orders.
- Developed responsive and user-friendly interfaces using React, HTML, CSS, and JavaScript, improving usability across desktop and mobile devices.
- Managed deployment using Netlify, Render, and MongoDB Atlas while maintaining source code with Git and GitHub throughout the development lifecycle.

Projects

AI Cyber Security Analyst | *Python, Scikit-learn, Pandas, Streamlit, Machine Learning*

- Developed an AI-powered network intrusion detection system using the CICIDS2017 dataset containing over 2.8 million network traffic records.
- Performed data preprocessing, feature engineering, and exploratory data analysis to improve model performance and data quality.
- Trained and evaluated multiple machine learning models, with Random Forest achieving over **99.8%** classification accuracy for network attack detection.
- Built an interactive Streamlit web application to predict cyber attacks from network traffic and visualize model predictions in real time.

TaskFlow - Project Management System | *React, Node.js, Express.js, MongoDB, JWT*

- Developed a full-stack project management application enabling users to create, organize, update, and track projects and tasks efficiently.
- Implemented secure JWT-based authentication, RESTful APIs, and complete CRUD functionality for projects and tasks.
- Designed a responsive React frontend with an Express.js backend and MongoDB Atlas for scalable cloud data storage.
- Deployed the frontend on Netlify and backend on Render while maintaining version control using Git and GitHub.

Curio -E-Commerce Website | *React, Node.js, Express.js, MongoDB*

- Built a responsive full-stack e-commerce platform featuring product browsing, shopping cart, user authentication, and order management.
- Developed RESTful APIs for product, user, and order management using Express.js and MongoDB.
- Implemented responsive user interfaces using React, HTML, CSS, and JavaScript to provide a seamless shopping experience across devices.
- Integrated MongoDB Atlas for cloud database management and deployed the application using modern web hosting platforms.

Technical Skills

Languages: Java, Python, C++, C, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: React.js, Node.js, Express.js, Streamlit, Scikit-learn, Pandas, NumPy

Databases: MongoDB, MongoDB Atlas, MySQL

Developer Tools: Git, GitHub, VS Code, Eclipse, Postman, AWS, Render, Netlify

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Machine Learning, REST APIs
