Education

Vellore Institute of Technology (VIT), Vellore

Jul. 2024 – Jul. 2028

B.Tech in Computer Science Engineering (Information Security)

CGPA: 8.41

Experience

CodeSoft

June 2026 – July 2026

Web Development Intern

Remote

- Developed full-stack web applications including **TaskFlow** and an **E-Commerce platform** using the MERN stack (React, Node.js, Express.js, MongoDB).
- Implemented **JWT-based authentication**, authorization, RESTful APIs, and complete CRUD operations for users, projects, tasks, products, and orders.
- Developed responsive and reusable user interfaces using **React, JavaScript, HTML, and CSS**, supporting desktop and mobile devices.
- Integrated **MongoDB Atlas** for cloud database management and deployed applications using **Netlify and Render**.
- Used **Git and GitHub** for version control and source code management throughout the application development lifecycle.

Projects

AI Cyber Security Analyst | *Python, Scikit-learn, Pandas, Streamlit, Machine Learning*

- Built a machine learning-based **Network Intrusion Detection System (NIDS)** using the CICIDS2017 dataset containing over **2.8 million network traffic records**.
- Performed **data preprocessing, data cleaning, feature engineering, exploratory data analysis (EDA), and feature scaling** to prepare network traffic data for machine learning.
- Trained and evaluated **Logistic Regression, Decision Tree, and Random Forest** classification models, with Random Forest achieving over **99.8% accuracy** for network attack detection.
- Built an interactive **Streamlit web application** for real-time network traffic classification, cyber attack prediction, and visualization of model predictions.

TaskFlow – Project Management System | *React, Node.js, Express.js, MongoDB, JWT*

- Built a full-stack project management application enabling users to create, organize, update, and track **projects and tasks** efficiently.
- Implemented secure **JWT authentication, authorization, RESTful APIs, and CRUD operations** for project and task management using Node.js, Express.js, and MongoDB.
- Designed a responsive **React frontend** with an Express.js backend and MongoDB Atlas for cloud-based data storage.
- Deployed the frontend on **Netlify** and backend on **Render** while maintaining source code using Git and GitHub.

Curio – E-Commerce Website | *React, Node.js, Express.js, MongoDB*

- Built a responsive full-stack **E-Commerce platform** featuring product browsing, shopping cart, user authentication, and order management.
- Developed **RESTful APIs** for product, user, cart, and order management using Express.js and MongoDB.
- Implemented responsive and reusable frontend components using **React, JavaScript, HTML, and CSS** for cross-device usability.
- Integrated **MongoDB Atlas** for cloud database management and deployed the application using modern web hosting platforms.

Certifications

- **Qualcomm AI Upskilling – Technical Foundation**

Technical Skills

Languages: Java, Python, C++, C, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: React.js, Node.js, Express.js, Streamlit, Scikit-learn, Pandas, NumPy

Databases: MongoDB, MongoDB Atlas, MySQL

Developer Tools: Git, GitHub, VS Code, Eclipse, Postman, AWS, Render, Netlify

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Machine Learning, REST APIs, Authentication, Authorization, CRUD, API Development
